

**Title: Software Engineering - Intern****Location – FICO, Bangalore****The Opportunity:**

The Engineering teams at FICO build software and applications for various software solutions such as the FICO Scores consumer-facing business, FICO Platform and Fraud prevention and detection products. We dedicate time building delightful customer experiences on mobile apps, responsive web APIs on the AWS cloud and backed by loads of automation, tooling, and monitoring.

Expect to gain innovative and real-world software engineering experience collaborating with talented engineers, using the latest cutting-edge technologies, in small collaborative teams.

**During your internship, you will gain firsthand experience:**

- Developing APIs & web services in Java
- Building dynamic web applications in JavaScript (Angular)
- Deploying and running applications on AWS
- In Automation and performance testing
- Collaborating with cross-functional teams such as product management, information security, etc.

**What We are Seeking:**

- Currently pursuing a Bachelor's degree in Computer Science or related information technology program.
- Experience with an academic project, previous internship, and/or personal development project with a programming language: Java and/or C++.
- Curiosity to learn and grow your skills.
